DETAILED ACTION

Allowable Subject Matter

1. Claims 13-15 and 23 are allowed.
2. The indicated allowability of claims 1, 3-12, 16, and 18-21 is withdrawn in view of further consideration of the specification and the court decisions regarding nonstatutory subject matter. Rejection follows.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 3-12, 16, and 18-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 16 and 18-21 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent and recent Federal Circuit

decisions (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876) and *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008))

indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing.

While claims 16 and 18-21 recite a series of steps or acts to be performed, the claims neither transform underlying subject matter nor are positively tied to another statutory

category that accomplishes the claimed method steps, and therefore does not qualify as a statutory process and is deemed to be purely software. The specification also plainly

states that the steps may be implemented through software, see page 5, lines 19

- 27. Therefore, the specification provides overwhelming evidence that the claimed steps cover nonstatutory embodiment, i.e. software per se.

Regarding claims 1 and 3 – 12, claims 1 and 3 – 12 appear to be directed to a system, however the claims as a whole is directed to be implemented through media proxy which is

Art Unit: 2614

disclosed as software and hence the claims as a whole are claiming software which does not belong in any of the statutory eligible classes/categories of invention. The specification again provides overwhelming evidence at page 5, lines 19 – 27 that the claimed media proxy covers nonstatutory embodiments.

Response to Arguments

4. Applicant's amendments and arguments with respect to the rejections of claims 25 and 26 have been fully considered and are persuasive. Therefore, the rejections have been withdrawn. However, upon further consideration, a new ground of rejection is made as stated above.
